

FLEXIBLE, SHIELDED COMMUNICATIONS CABLE

Low-voltage cable. Neoprene, polyurethane, TPR or PVC jacketed. Designed for constant flexing. Shielded to prevent RFI and EMI.

SUPER HEAVY-DUTY ALL WEATHER PENDANT AND REEL CABLE

Designed for use in continuous flexing applications including festoon systems, power tracks, cranes, cable reels and other abusive flexing situations. It features an oil-resistant, weather-resistant, heavy-duty jacket with an inner reinforcing braided binder. Rated at 600 volts from -40C to 90C.

FLAT AND FESTOON CABLES

The small bending radius of this cable permits use on lifts using festoon applications where space is at a premium. It is available with a Neoprene or PVC jacket. Rated at 600 volts.

RETRACTILE CORDS

Weather and oil resistant, custom-engineered retractile cords are available with Neoprene, Polyurethane, PVC and TPR jackets. Rated at 300 and 600 volts.

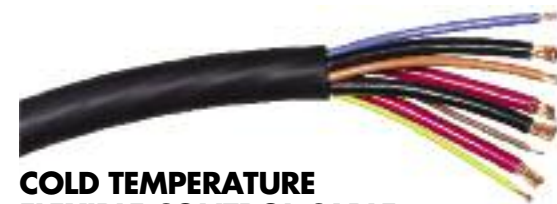

EUROPEAN-APPROVED FLEXIBLE CABLE

Extremely flexible with Neoprene, polyurethane and PVC jackets. Rated 150, 300 and 600 volts. (VDE HAR approved.)

CUSTOM HARNESSES AND CABLE ASSEMBLIES

Customized assemblies for electrical interconnect systems. Manufactured to customer specifications for every application.

COLD TEMPERATURE FLEXIBLE CONTROL CABLE

Heavy duty, weather-resistant, flexible cable engineered to withstand the hazards of extremely cold environments. Rated to -70C. Rated at 600 volts.

FLEXIBLE COMBINATION CABLES FOR CONTROL, SIGNAL & COMMUNICATIONS

Custom engineered cables that combine power, signal and control applications into a single cable designed for constant flexing. Weather-resistant Neoprene TPR, and PVC jackets. Rated 600 volts.

EXTRA-SMALL DIAMETER FLEXIBLE CABLE

Low voltage cable custom engineered for maximum flexibility. Neoprene, PVC and TPR jackets. Rated 150 and 300 volts.

We specialize in one field - Flexible Wire and Cable.

From its design through your on-time delivery.

Why Paige®?

Because you need a flexible cable pro....

Who understands where you're coming from
Who covers the total spectrum of your cable and accessory needs
Who can talk-the-talk with your people
Who from coast-to-coast maintains the industry's largest, most comprehensive stock so your stock can stay small

Because you need one-to-one service...

From someone who answers the phone when you call.
Who's obsessed with personal, immediate response, service.
Someone who delivers the hard-to-find items.
Someone who will stock a cable, when others won't.
Someone with fast, same-day shipping.

Who's an easy-to-do-business-with  ally.

Who takes your business personally.

Paigeplus

PAIGEPLUS FLEXIBLE CABLE

STRANDING: CLASS K or M

INSULATION: PVC/NYLON

BRAID: FLAT NYLON

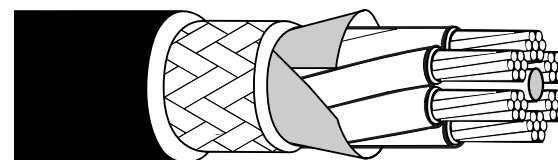

JACKET: NEOPRENE

SIZES: 2 - 37 CONDUCTOR, #18 - 1/0 AWG

RATED 600 VOLTS

UL and CSA AWM Approved

UL-583 Certified

we are
flexible Our cables are

used for electric fork trucks, aerial work platforms, scissor lifts, electric boom lifts, telehandlers, mast lifts, cranes, hoists, and robotics.
